4Dimension
empower you with knowledge

in partnership with

KSTQB
Korean Software Testing
Qualifications Board

CERTIFIED TESTER FOUNDATION LEVEL (CTFL)

BENEFITS FOR PROFESSIONALS:

- ✓ International recognition of acquired competencies and skills

- ✓ Authorize to use the "Certified Tester" logo (Specifying the level of certification)

- ✓ Whole of career path support, from Foundation to Expert level

4Dimension UAE is proud to announce its partnership with Korean Software Testing Qualifications Board (KSTQB) the company founded in 2005 for providing foundation and advance level of ISTQB certifications. We are one of the few providers recognized by ISTQB (International Software Testing Qualification Board).

KSTQB is an international board member of ISTQB and an accredited exam provider.

Why ISTQB Qualifications for Software Testers?

ISTQB (International Software Testing Qualification Board) Certified Tester is the most widespread software testing qualification scheme in the world, and the syllabi contents and glossary have become a de facto industry standard for the software testing profession. There are now 51 member boards covering 72 countries around the world. Since the scheme started, over 450,000 candidates have been successfully awarded ISTQB Certificates.

It is not an 'option' now but a 'must-have' qualification for anyone who involved in the field of software and SW testing locally and internationally.

Foundation Syllabus Course

This tutor-led course takes three-days and includes full coverage of the course syllabus, examination preparation and revision.

The examination will be taken [TBD: either immediately after the course or a few days later to allow candidates to do some personal revision (but before they forget the course)].

The examination is **fully-accredited by KSTQB** on **behalf of ISTQB.**

Who is the Foundation Qualification for?

The Foundation Level qualification is aimed at professionals who need to demonstrate practical knowledge of the fundamental concepts of software testing. This includes people in roles such as test designers, test analysts, test engineers, test consultants, test managers, user acceptance testers and IT Professionals.
The Foundation Level qualification is also appropriate for anyone who needs a basic understanding of software testing, such as project managers, quality managers, software development managers, business analysts, IT directors and management consultants.

Entry Criteria for the Foundation Qualification

It is suggested that candidates for the Foundation Level certification have at least six months' practical experience in a professional testing role.

Before taking the course it is recommended that candidates read the CTFL (Certified Tester Foundation Level) Syllabus in preparation. The course is intensive and those candidates who have prepared will achieve a higher success rate in the exam.
Successful Foundation Level Certified Testers should be able to:

- Use a common language for efficient and effective communication with other testers and project stakeholders.
- Understand established testing concepts, the fundamental test process, test approaches, and principles to support test objectives.

- Design and prioritize tests by using established techniques; analyze both functional and non-functional specifications (such as performance and usability) at all test levels for systems with a low to medium level of complexity.
- Execute tests according to agreed test plans, and analyze and report on the results of tests.
- Write clear and understandable incident reports.
- Effectively participate in reviews of small to medium-sized projects.
- Be familiar with different types of testing tools and their uses; assist in the selection and implementation process.

EDUCATION & TRAINING we are offering UAE based certified tester foundation level course (CTFL) in preparation for taking the exam to become a **Certified Tester**.
